

Announcing the Expanded Summer Seminar Series

www.lib.unb.ca/Texts/SGML_course/2005/

August 2-13, 2005

The Electronic Text Centre at the University of New Brunswick is offering for the ninth consecutive year a Summer Seminar Series of five workshops exploring issues in scholarly communication. The series is designed to offer introductory and advanced level courses that effectively balance technical components with theoretical and practical "hands-on" learning opportunities in state-of-the-art, information technology labs. Participants will gain a greater understanding of the latest techniques, tools and standards while expanding their communities of practice.

For registration, workshop and accommodation information visit:
www.lib.unb.ca/Texts/SGML_course/2005/
